## Chairperson's Foreword

Statistics is increasingly becoming recognized as an essential tool in the development of a country. One of the primary sources of statistics is an annual publication like a yearbook which compiles all available information and data in a single reference document. It is in this context that it is a matter of great pleasure and satisfaction to me, and indeed to the Southern Sudan Centre for Census, Statistics and Evaluation (SSCCSE) as a whole, to be able to produce the 2010 issue of the *Statistical Yearbook for Southern Sudan*.

This is the second of our planned annual issues - the first ever *Statistical Yearbook for Southern Sudan* having been released in 2009 - and it is heartening to note that the publication is growing more comprehensive, and now presents a wider and more up-to-date coverage of statistical information that previously has not been easily available in a single reference volume.

The Statistical Yearbook is the end product of a collaborative effort - while some of the information contained here comes from SSCCSE data sources, such as the recently released estimates of poverty incidence, much is also drawn from various other GOSS agencies. This spirit of cooperation and collaboration is the foundation of a sound statistical system which includes the SSCCSE as the focal statistical agency, but also includes various other data producers across the Government and international agencies. I am grateful for this collaboration from various agencies and it is my sincere hope that this will continue to increase in coming years.

Our primary role is to support the emergence of evidence-based policy making in Southern Sudan by providing the necessary informational base, as well as the sensitization of various stakeholders to the importance of using this information. Not only do we endeavour to provide existing data in the public domain through publications such as this Yearbook, in case such data are not available, we also commission independent data collection activities at the request of our stakeholders. As such, we will always welcome any initiatives at collaboration and we would always be happy to do as much as possible to help our sister agencies in their daily work.

As is true of all collaborative efforts, there are many partners who contributed in making this publication possible. Foremost, I would like to thank the agencies that contributed the information contained in this volume. I would also like to thank the many development partners who have assisted SSCCSE, and GOSS more broadly, in the collection of much of this information through technical and financial assistance. I would like to thank UNDP in particular for assisting us financially in the publication of this volume. And finally, I would like to thank all the users of statistics in Southern Sudan who have engaged with us continuously and form the core audience for this publication, thus justifying its production.

This year is, as we are all aware, a memorable year in the history of Southern Sudan as it brings the Interim period under the Comprehensive Peace Agreement to a close. This year has also marked the first democratic

elections in Southern Sudan in over two decades. As such, the information contained in this particular volume of the Statistical Yearbook, including much on the historic elections, should be of lasting interest to the scholars, the administrators and the general public of Southern Sudan. It will also, we expect, provide a baseline to measure progress against in the years and decades to come.

I hope you find the publication useful. If you have access to further statistical information, or would like our assistance in converting administrative records to statistics, that may be useful for future annual volumes of the Statistical Yearbook, please do contact us. As always, we also welcome constructive feedback and appreciate any comments aimed at improving the quality of our further publications, or indeed our broader functioning.

Isaiah Chol Aruai  
Chairperson, SSCSE

## The Southern Sudan Centre for Census Statistics and Evaluation

### Functions and Organization

#### Introduction

The origins of the Southern Sudan Centre for Census Statistics and Evaluation (SSCCSE) date back to 1995 when it served as a Database and Monitoring Unit under the then Sudan Relief and Rehabilitation Association (SRRA).

In 2005, following the signing of the Comprehensive Peace Agreement (CPA) and the promulgation of the Southern Sudan Interim Constitution, the Centre was founded and has since assumed the roles specified in the Interim Constitution of Southern Sudan, 2005.

The Management of the Centre is under the direct responsibility of the **Chairperson** as Chief Executive. The chairperson is assisted in his/her day to day management responsibilities and duties by the **Deputy Chairperson**.

The Deputy Chairperson is responsible for the day to day implementation of the decisions of the Board and supervision of staff.

#### The Guiding Principles

The Centre has some guiding principles including:

- Impartiality
- Fulfillment of citizens' entitlement to public information.
- Decisions made strictly on professional considerations, scientific principles and professional ethics regarding the methods and procedures for collection, processing, storage and dissemination of statistical data
- Choice of the right sources of statistical data drawn from various sources such as surveys or administrative records on the basis of quality, timeliness, costs and the burden on respondents.
- Ensuring that individual data collected for statistical compilation shall be strictly confidential and used exclusively for statistical purposes
- Adhering to the use of international statistical concepts, standards and methods so as to promote consistency and efficiency of the statistical system.

#### The Overall Goals and objectives of the Centre are to:

- Collect, compile, analyze and publish all official statistics on economic, social, demographic, environmental and general activities and conditions of the people of Southern Sudan
- Conduct all censuses and surveys that are carried out throughout Southern Sudan
- Monitor and evaluate social impacts of public policies, projects and programs
- Monitor the progress of poverty eradication and the attainment of the Millennium Development Goals, and
- Establish statistical standards and ensure adherence by all producers of statistics

#### The Specific Functions of the Centre

The functions of the Centre are spelt out in the Act, 2004 and are:

- Carry out Censuses and relevant surveys in the Southern Sudan
- Promote and develop integrated socio-economic statistics pertaining to Southern Sudan and each region thereof and co-ordinate plans for the integration of those statistics and keep these plans under review.

- Establish statistical standards and their use by all producers of statistics so as to facilitate integration and comparison.
- Co-ordinate statistics and data collection activities so as to avoid duplication, ensure economic use of resources and reduce the burden on respondents.
- Collect, compile, analyse and disseminate statistics and related information on social, economic, demographic and environmental activities.
- Maintain an inventory of available and relevant information in the Southern Sudan.
- Assist users of statistical information in obtaining international statistics and information.
- Provide statistical, monitoring and evaluation services and professional assistance to official bodies, civil society, researchers and international institutions and the public in general.
- Provide the contact point for international organizations and researchers in need of statistics and information on the South Sudan.
- Act as a contact point for international organizations and foreign institutions in the need of statistics on matters relating to South Sudan.

### **Organization of the SSCCSE**

To reflect the main goals and objectives of the Centre and to make sure that its work is carried out in a cost effective way, the SSCCSE has:

- An Organizational Chart
- A number of subject matter specialists to be recruited consistent with the Organizational Chart of the Centre.
- A data collection system for vital records, surveys and censuses, with the corresponding specialized functions like questionnaire design, sampling, field management, cartography etc

In order to be able to carry out the principal functions, a number of support functions have also been put in place.

Thus the Head Office in Juba has five main technical departments viz. Census and Surveys Department, Economic Statistics Department, Social and Demographic Statistics Department, Planning, Monitoring and Evaluation Department and Geographical Information Systems (GIS) Department. Additionally, there are two support departments – Finance and Administration Department and Information, Communication and Technology (ICT) Department.

### **The Juba and Rumbek Offices**

The SSCCSE has its headquarters in Juba where most of its activities are supervised from. It also has a data processing centre in Rumbek where all census and other data processing is executed.

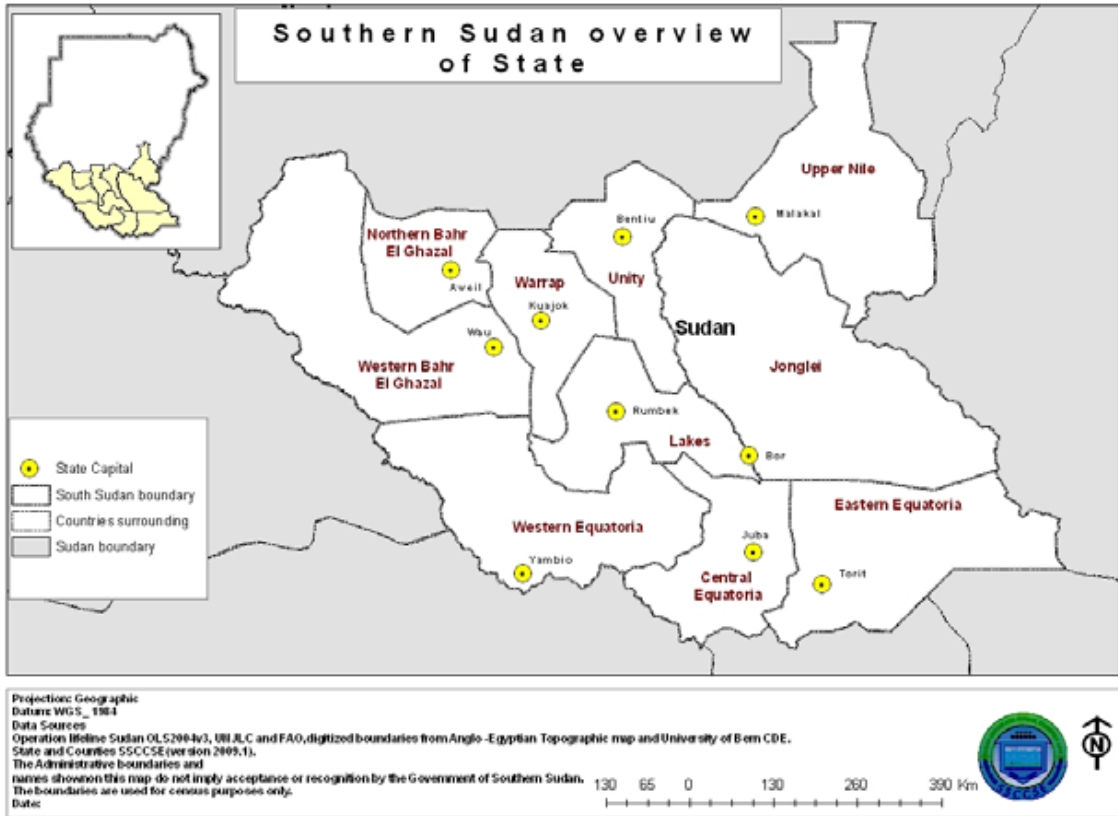

Additionally, State Statistical offices have been established in every one of the ten (10) states. These offices are central to the Centre's ability to mount large-scale South-Sudan-wide statistical activities; they are also our focal communication links with various State and local authorities in different states.

Contact details for the Centre are provided at the back of this Yearbook for ease of future collaboration.
